

University of Missouri
The International Center

Authorization for Release of Information

The University of Missouri International Center's Student Accommodation Request Form is designed to communicate the type of accommodation a student with a disability will need when studying abroad. Together with the Coordinator in the Office of Disability Services, the student reviews the Request Form and determines the accommodations needed. The Request Form is then given to the appropriate study abroad staff member and sent to the overseas contact and program provider contact. The overseas contact and program provider contact review the accommodation needs and respond, identifying the accommodations that can be provided and how they will be implemented. The study abroad staff person then communicates this information to the student in writing and meets with the student as needed.

By signing this document, I give permission to the MU International Center Staff to contact the overseas staff and program provider regarding my accommodation requests. If I do not request accommodations at this time, I understand that it is my responsibility to contact Disability Services and request accommodations if I should identify accommodation needs after I arrive at the overseas site. I understand that at that time, Disability Services staff will contact the International Center, as well as the overseas site and/or the program provider and will attempt to facilitate reasonable accommodations.
