Study abroad is a fantastic way to enhance your academic career and gain professional skills and experiences to help you be more competitive in the job market. With programs lasting from two weeks to an academic year, MU will help you find a program to meet your academic and personal goals.

THINGS TO CONSIDER:

- Meet with your academic adviser to discuss the best time for you to go abroad.

- Include your family so they understand the process and how study abroad will benefit your professional goals and personal interests.

- Talk to a study abroad adviser about which program would best meet your needs.

- Learn about your financing options and how to use financial aid for study abroad.

- Consider completing an international internship to develop important contacts and skills for your future career.
